## A WORD FROM OUR SECRETARY

It's been great seeing everyone at the shows! And the training shows have been a great addition to the season.

This month is Immunization Awareness month, and we want to talk about them. The AVMA defines core vaccinations as those "that protect from diseases that are endemic to a region, those with potential public health significance, required by law, virulent/highly infectious, and/or those posing a risk of severe disease. Core vaccines have clearly demonstrated efficacy and safety, and thus exhibit a high enough level of patient benefit and low enough level of risk to justify their use in the majority of patients."

Core equine vaccines are: Rabies, Eastern/Western Equine Encephalomyelitis, Tetanus, and West Nile Virus.

September will be our last show at Shartelsville as the grounds have been sold. Everything is to be auctioned off beginning of December.

Looking forward to see you all soon, Secretary Joanne Thayer

# EQUINE VACCINE RECOMMENDATIONS

The AVMA defines core vaccinations as those “that protect from diseases that are endemic to a region, those with potential public health significance, required by law, virulent/highly infectious, and/or those posing a risk of severe disease. Core vaccines have clearly demonstrated efficacy and safety, and thus exhibit a high enough level of patient benefit and low enough level of risk to justify their use in the majority of patients.”

The following equine vaccines meet these criteria and are identified as ‘core’ in these guidelines.

**Eastern/Western Equine Encephalomyelitis:** EEE activity in mosquitoes and birds, and resultant disease in humans and equids, continues to cause concern along the East Coast and demonstrates northward encroachment.

**Rabies:** While the incidence of rabies in horses is low, the disease is invariably fatal and has considerable public health significance.

**Tetanus:** All horses are at risk of development of tetanus, an often fatal disease caused by a potent neurotoxin elaborated by the anaerobic, spore-forming bacterium, Clostridium tetani. Tetanus toxoid is a core equine vaccine and is indicated in the immunization program for all horses.

**West Nile Virus:** *West Nile virus (WNV) is the leading cause of arbovirus encephalitis in horses and humans in the United States. Since 1999, more than 25,000 cases of WNV encephalitis have been reported in U.S. horses. Horses represent 96.9% of all reported non-human mammalian cases of WNV disease.*
